Class Documentation

6.1 DoorCheckTest Class Reference

Handles the door angle detection unit testing using gtests.

Inheritance diagram for DoorCheckTest:

Collaboration diagram for DoorCheckTest:

Protected Member Functions

• DoorCheckTest ()

12 Class Documentation

Default constructor.

virtual void SetUp ()

Sets up the class variables for each unit test call.

virtual void TearDown ()

This function is called after the termination of each test. Destroys the dynamically alloced variables.

Protected Attributes

DoorCheck * door_check_

6.1.1 Detailed Description

Handles the door angle detection unit testing using gtests.

Definition at line 112 of file unit_tests.cpp.

6.1.2 Constructor & Destructor Documentation

```
6.1.2.1 DoorCheckTest::DoorCheckTest() [inline], [protected]
```

Default constructor.

Definition at line 119 of file unit_tests.cpp.

6.1.3 Member Function Documentation

```
6.1.3.1 virtual void DoorCheckTest::SetUp() [inline], [protected], [virtual]
```

Sets up the class variables for each unit test call.

Definition at line 125 of file unit tests.cpp.

```
6.1.3.2 virtual void DoorCheckTest::TearDown() [inline], [protected], [virtual]
```

This function is called after the termination of each test. Destroys the dynamically alloced variables.

Definition at line 133 of file unit_tests.cpp.

6.1.4 Member Data Documentation

```
6.1.4.1 DoorCheck* DoorCheckTest::door_check [protected]
```

Pointer of type DoorCheck. Used to check its functions

Definition at line 138 of file unit_tests.cpp.

The documentation for this class was generated from the following file:

/home/travis/rapp_temp/rapp-platform/rapp_hazard_detection/tests/hazard_detection/unit_tests.cpp

6.2 functional_tests.HazardDetectionFunc Class Reference

Inheritance diagram for functional_tests.HazardDetectionFunc:

Collaboration diagram for functional_tests.HazardDetectionFunc:

Public Member Functions

• def test_door_fileDoesNotExist

Tests door detection with a non existent image.

• def test_door_fileExistsButItAudio

Tests door detection with an audio file.

· def test_door_stress

Stress test for door detection.

def test_doorClosed

Tests door detection with door closed.

def test_doorOpen

Tests door detection with door opened.

· def test_light_fileDoesNotExist

Tests light detection with a non existent image.

def test_light_fileExistsButItAudio

Tests light detection with an audio file.

def test_light_stress

Stress test for light detection.

14 Class Documentation

· def test_lightOff

Tests light detection with lamp turned off.

· def test lightOn

Tests light detection with lamp turned on.

6.2.1 Detailed Description

Handles the hazard detection functional tests

Definition at line 34 of file functional_tests.py.

6.2.2 Member Function Documentation

6.2.2.1 def functional_tests.HazardDetectionFunc.test_door_fileDoesNotExist (self)

Tests door detection with a non existent image.

Should return -1

Definition at line 145 of file functional tests.py.

6.2.2.2 def functional_tests.HazardDetectionFunc.test_door_fileExistsButltAudio (self)

Tests door detection with an audio file.

Should not crush an return -1

Definition at line 158 of file functional_tests.py.

6.2.2.3 def functional_tests.HazardDetectionFunc.test_door_stress (self)

Stress test for door detection.

20 calls in a row

Definition at line 131 of file functional_tests.py.

 $6.2.2.4 \quad def \ functional_tests. Hazard Detection Func. test_door Closed \left(\begin{array}{c} \textit{self} \end{array} \right)$

Tests door detection with door closed.

Definition at line 118 of file functional_tests.py.

6.2.2.5 def functional_tests.HazardDetectionFunc.test_doorOpen (self)

Tests door detection with door opened.

Definition at line 105 of file functional_tests.py.

 $6.2.2.6 \quad def \ functional_tests. Hazard Detection Func. test_light_file Does Not Exist \left(\begin{array}{c} \textit{self} \end{array} \right)$

Tests light detection with a non existent image.

Should return -1

Definition at line 79 of file functional_tests.py.

6.2.2.7 def functional_tests.HazardDetectionFunc.test_light_fileExistsButltAudio (self)

Tests light detection with an audio file.

Should not crush an return -1

Definition at line 92 of file functional tests.py.

6.2.2.8 def functional_tests.HazardDetectionFunc.test_light_stress (self)

Stress test for light detection.

20 calls in a row

Definition at line 65 of file functional tests.py.

6.2.2.9 def functional_tests.HazardDetectionFunc.test_lightOff (self)

Tests light detection with lamp turned off.

Definition at line 52 of file functional_tests.py.

6.2.2.10 def functional_tests.HazardDetectionFunc.test_lightOn (self)

Tests light detection with lamp turned on.

Definition at line 39 of file functional_tests.py.

The documentation for this class was generated from the following file:

/home/travis/rapp_temp/rapp-platform/rapp_hazard_detection/tests/hazard_detection/functional_tests.py

6.3 LightCheckTest Class Reference

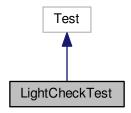

Handles the light cheking unit testing using gtests.

Inheritance diagram for LightCheckTest:

16 Class Documentation

Collaboration diagram for LightCheckTest:

Protected Member Functions

LightCheckTest ()

Default constructor.

virtual void SetUp ()

Sets up the class variables for each unit test call.

• virtual void TearDown ()

This function is called after the termination of each test. Destroys the dynamically alloced variables.

Protected Attributes

• LightCheck * light_check_

6.3.1 Detailed Description

Handles the light cheking unit testing using gtests.

Definition at line 28 of file unit_tests.cpp.

6.3.2 Constructor & Destructor Documentation

6.3.2.1 LightCheckTest::LightCheckTest() [inline], [protected]

Default constructor.

Definition at line 35 of file unit_tests.cpp.

6.3.3 Member Function Documentation

6.3.3.1 virtual void LightCheckTest::SetUp() [inline], [protected], [virtual]

Sets up the class variables for each unit test call.

Definition at line 41 of file unit_tests.cpp.

6.3.3.2 virtual void LightCheckTest::TearDown() [inline], [protected], [virtual]

This function is called after the termination of each test. Destroys the dynamically alloced variables.

Definition at line 49 of file unit_tests.cpp.

6.3.4 Member Data Documentation

6.3.4.1 LightCheck* LightCheckTest::light_check [protected]

Pointer of type LightCheck. Used to check its functions

Definition at line 54 of file unit_tests.cpp.

The documentation for this class was generated from the following file:

• /home/travis/rapp_temp/rapp-platform/rapp_hazard_detection/tests/hazard_detection/unit_tests.cpp

18 **Class Documentation**

File Documentation

20 File Documentation

Classes

· class DoorCheckTest

Handles the door angle detection unit testing using gtests.

class LightCheckTest

Handles the light cheking unit testing using gtests.

Functions

• int main (int argc, char **argv)

The main function. Initialized the unit tests.

• TEST_F (LightCheckTest, test_on)

Tests light detection with the lamp turned on. Should be successful.

TEST_F (LightCheckTest, test_off)

Tests light detection with the lamp turned off. Should be successful.

• TEST_F (LightCheckTest, test_size)

Tests light detection on the same image with different scales.

TEST_F (LightCheckTest, file_not_exists_test)

Tests light detection with a missing file. Should return 0.

TEST_F (DoorCheckTest, file_not_exists_test)

Tests door angle detection with a missing file. Should return 0.

TEST_F (DoorCheckTest, door_open_test)

Tests door angle detection with a example file. Should return positive value.

7.2.1 Function Documentation

```
7.2.1.1 int main ( int argc, char ** argv )
```

The main function. Initialized the unit tests.

Definition at line 167 of file unit_tests.cpp.

```
7.2.1.2 TEST_F ( LightCheckTest , test_on )
```

Tests light detection with the lamp turned on. Should be successful.

Definition at line 61 of file unit_tests.cpp.

```
7.2.1.3 TEST_F ( LightCheckTest , test_off )
```

Tests light detection with the lamp turned off. Should be successful.

Definition at line 72 of file unit tests.cpp.

```
7.2.1.4 TEST_F ( LightCheckTest , test_size )
```

Tests light detection on the same image with different scales.

Definition at line 84 of file unit_tests.cpp.

```
7.2.1.5 TEST_F ( LightCheckTest , file_not_exists_test )
```

Tests light detection with a missing file. Should return 0.

Definition at line 97 of file unit_tests.cpp.

7.2.1.6 TEST_F (DoorCheckTest , file_not_exists_test)

Tests door angle detection with a missing file. Should return 0.

Definition at line 145 of file unit_tests.cpp.

7.2.1.7 TEST_F (DoorCheckTest , door_open_test)

Tests door angle detection with a example file. Should return positive value.

Definition at line 156 of file unit_tests.cpp.
